SUMMARY

I am a graduate of Computer and Network Engineering from SMK Negeri 2 Surakarta with excellent academic and non-academic achievements. During my school years, I actively assisted the toolman in managing the school's network and devices. I have a strong understanding of networks and servers, and I am proficient in configuring network devices as well as Linux and Windows operating systems. Additionally, during my internship, I received training in soft skills. I also have good communication skills in the Indonesian language.
